

Addendum to MCF5206 User Manual

April 13, 1998

This addendum to the initial release of the **MCF5206UM/AD** User's Manual provides corrections to the original text, plus additional information not included in the original. This document and other information on this product is maintained on the World Wide Web at <http://sps.motorola.com/coldfire>

Power Consumption - Addition to Electrical Specifications

The power consumption figures stated are for 5.0 V and 50 pf loads on all pins, room temperature. The code which was used was Dhrystone 2.1. The data is as follows:

Table 1: MCF5206 Power Consumption

16MHZ	25MHz	33MHz	UNITS
388	554	722	mW

Instruction Set Architecture

The Instruction Set Summary shown on pages 1-10 through 1-14 should be replaced with the following :

↔	Two operands are exchanged
sign-extended	All bits of the upper portion are made equal to the high-order bit of the lower portion
If <condition> then <operations> else <operations>	Test the condition. If true, the operations after 'then' are performed. If the condition is false and the optional 'else' clause is present, the operations after 'else' are performed. If the condition is false and else is omitted, the instruction performs no operation. Refer to the Bcc instruction description as an example.
